

# Connecticut Builder

WINTER 2003

The Voice Of The Home Building, Remodeling And Land Development Industries in Connecticut

There's a coffered ceiling in the country kitchen and an island with marble French bakery top. The red oak floors are burned and ragged with white paint to look antique.

Custom Architectural Millwork in Norwalk supplied and installed the beautifully detailed kitchen cabinets with etched glass inserts, as well as the fireplace surrounds, office built-ins and master bath moldings and vanities. The home's marble master bath is outfitted with a tent ceiling, heated floor and old-fashioned Kohler Vantage tub.
